

HOARDTEK
TEMPORARY HOARDING SPECIALISTS

Site Compounds

Secure Storage & Office Areas

HoardTek site compounds give sites a professional image whilst maintaining security and safety. All forms of vehicle & pedestrian gates are available.

Non-intrusive, completely freestanding

Our compounds are freestanding, non-penetrative systems. This leaves no damage to the site's environment after removal.

Full design & calculations provided

All site compounds use panels of at least class 1 spread of flame and have full temporary works compliant designs and calculations.

Easy to adapt to site requirements

When site conditions change it is easy to adjust accordingly

0845 257 0707

Fully reusable & recyclable

All panels used are made from 100% post consumer uPVC. They are in turn recyclable at the end of their lifespan.

Supports full branding & advertising

The quality finish allows the use of vinyl stickers to be applied directly, to further enhance your public image.

No maintenance

Our unique system requires absolutely no routine maintenance for the duration of any project.
